

# Higgins Horticultural Services

## References and Referrals

Higgins Horticultural Services operating out of Asheville, is a full service landscaping company. Annie Higgins and her husband, Jim, offer a wide spectrum of services, from design and installation to irrigation systems. Annie has a degree in horticulture, extensive experience in landscaping in general, and an in-depth knowledge of the microclimates that exist in Kenmure. She visited twice before developing a plan, ensuring that she understood our wishes and that we were fully apprised of the selections available to us. She developed a comprehensive plan, delivering it within a week of our second visit. Annie has an artist's eye for color. Her creations are aesthetically pleasing and suitable for their surroundings. Annie and her crew installed the plants on schedule, and ensured the debris from their work was cleared immediately. Jim performed adjustments to our irrigation system to ensure the new plantings were properly irrigated. Annie provided comprehensive follow on instructions to ensure the plants continue to thrive. We were delighted with the process from start to finish, and highly recommend this company.

*Greg and Kathy Newbold - Kenmure, North Carolina*

Annie has a professional and structured approach to projects and is very adept at asking the right leading questions in attempting to get at the vision we had for the property. She translated her findings, our comments and desires, very well into an integrated landscape design, and has been very available post design to answer questions and provide guidance for areas of our concern. She has a genuine love for her chosen career and her enthusiasm is infectious. It was and remains a pleasure to work with her.

# HIGGINS HORTICULTURAL SERVICES

Anne and Jim Higgins and their capable team did a great job of preparing the soil and installing sod for us. They were punctual and reliable. They even extended their time with us so that we could expand our project. After the job was done, they checked in with us to make certain that everything was progressing well. Our new grass looks great, and we look forward to having team Higgins return to help us again in the fall.
